```
Codebook

[1]  "subject_id": Person Id
[2]  "activity_label": Activity being Measures
[3]  "Time domain signal: Body acceleration,  mean value in X direction"
[4]  "Time domain signal: Body acceleration,  mean value in Y direction"
[5]  "Time domain signal: Body acceleration,  mean value in Z direction"
[6]  "Time domain signal: Gravity acceleration,  mean value in X direction"
[7]  "Time domain signal: Gravity acceleration,  mean value in Y direction"
[8]  "Time domain signal: Gravity acceleration,  mean value in Z direction"
[9]  "Time domain signal: Body acceleration jerk,  mean value in X direction"
[10] "Time domain signal: Body acceleration jerk,  mean value in Y direction"
[11] "Time domain signal: Body acceleration jerk,  mean value in Z direction"
[12] "Time domain signal: Body angular velocity,  mean value in X direction"
[13] "Time domain signal: Body angular velocity,  mean value in Y direction"
[14] "Time domain signal: Body angular velocity,  mean value in Z direction"
[15] "Time domain signal: Body angular velocity jerk,  mean value in X direction"
[16] "Time domain signal: Body angular velocity jerk,  mean value in Y direction"
[17] "Time domain signal: Body angular velocity jerk,  mean value in Z direction"
[18] "Time domain signal: Body acceleration magnitude,  mean value "
[19] "Time domain signal: Gravity acceleration magnitude,  mean value "
[20] "Time domain signal: Body acceleration jerk magnitude,  mean value "
[21] "Time domain signal: Body angular velocity magnitude,  mean value "
[22] "Time domain signal: Body angular velocity jerk magnitude,  mean value "
[23] "Frequency domain signal: Body acceleration,  mean value in X direction"
[24] "Frequency domain signal: Body acceleration,  mean value in Y direction"
[25] "Frequency domain signal: Body acceleration,  mean value in Z direction"
[26] "Frequency domain signal: Body acceleration jerk,  mean value in X direction"
[27] "Frequency domain signal: Body acceleration jerk,  mean value in Y direction"
[28] "Frequency domain signal: Body acceleration jerk,  mean value in Z direction"
[29] "Frequency domain signal: Body angular velocity,  mean value in X direction"
[30] "Frequency domain signal: Body angular velocity,  mean value in Y direction"
[31] "Frequency domain signal: Body angular velocity,  mean value in Z direction"
[32] "Frequency domain signal: Body acceleration magnitude,  mean value "
[33] "Frequency domain signal: BodyBody acceleration jerk magnitude,  mean value "
[34] "Frequency domain signal: BodyBody angular velocity magnitude,  mean value "
[35] "Frequency domain signal: BodyBody angular velocity jerk magnitude,  mean value "
[36] "Time domain signal: Body acceleration,  standard deviation in X direction"
[37] "Time domain signal: Body acceleration,  standard deviation in Y direction"
[38] "Time domain signal: Body acceleration,  standard deviation in Z direction"
[39] "Time domain signal: Gravity acceleration,  standard deviation in X direction"
[40] "Time domain signal: Gravity acceleration,  standard deviation in Y direction"
[41] "Time domain signal: Gravity acceleration,  standard deviation in Z direction"
[42] "Time domain signal: Body acceleration jerk,  standard deviation in X direction"
[43] "Time domain signal: Body acceleration jerk,  standard deviation in Y direction"
[44] "Time domain signal: Body acceleration jerk,  standard deviation in Z direction"
[45] "Time domain signal: Body angular velocity,  standard deviation in X direction"
[46] "Time domain signal: Body angular velocity,  standard deviation in Y direction"
[47] "Time domain signal: Body angular velocity,  standard deviation in Z direction"
[48] "Time domain signal: Body angular velocity jerk,  standard deviation in X direction"
[49] "Time domain signal: Body angular velocity jerk,  standard deviation in Y direction"
[50] "Time domain signal: Body angular velocity jerk,  standard deviation in Z direction"
[51] "Time domain signal: Body acceleration magnitude,  standard deviation "
[52] "Time domain signal: Gravity acceleration magnitude,  standard deviation "
[53] "Time domain signal: Body acceleration jerk magnitude,  standard deviation "
[54] "Time domain signal: Body angular velocity magnitude,  standard deviation "
[55] "Time domain signal: Body angular velocity jerk magnitude,  standard deviation "
[56] "Frequency domain signal: Body acceleration,  standard deviation in X direction"
[57] "Frequency domain signal: Body acceleration,  standard deviation in Y direction"
[58] "Frequency domain signal: Body acceleration,  standard deviation in Z direction"
[59] "Frequency domain signal: Body acceleration jerk,  standard deviation in X direction"
[60] "Frequency domain signal: Body acceleration jerk,  standard deviation in Y direction"
[61] "Frequency domain signal: Body acceleration jerk,  standard deviation in Z direction"
```

```
[62] "Frequency domain signal: Body angular velocity,  standard deviation in X direction"
[63] "Frequency domain signal: Body angular velocity,  standard deviation in Y direction"
[64] "Frequency domain signal: Body angular velocity,  standard deviation in Z direction"
[65] "Frequency domain signal: Body acceleration magnitude,  standard deviation "
[66] "Frequency domain signal: BodyBody acceleration jerk magnitude,  standard deviation "
[67] "Frequency domain signal: BodyBody angular velocity magnitude,  standard deviation "
[68] "Frequency domain signal: BodyBody angular velocity jerk magnitude, standard deviation "
```
